SUMMARY

Full-Stack & Mobile Developer with a focus on building production-grade web and mobile applications using React Native, Next.js, and Python. Expert in deploying Serverless Microservices on AWS and integrating complex third-party systems (Cashfree, GetStream, Razorpay). Deeply experienced in Fintech logic, including automated payouts and escrow management. Passionate about writing clean, scalable code and delivering high-performance features in fast-paced environments.

TECHNICAL SKILLS

- **Languages:** JavaScript TypeScript, Python, C++
- **Frontend:** React.js, Next.js, React Native, Expo HTML5, CSS3, Tailwind CSS, NativeWind, Vite
- **Backend:** Node.js, Python, REST API Design, JWT, Webhook Architecture, Microservices
- **Cloud & Infrastructure:** AWS Lambda, AWS API Gateway, AWS EventBridge, AWS Secrets Manager, AWS CloudWatch, Vercel, Serverless Architecture
- **Databases & Caching:** MongoDB, MySQL, Supabase (PostgreSQL), Drizzle ORM, Valkey / Redis
- **Real-time & Integrations:** GetStream Video SDK, Cashfree Payments, Razorpay, Shiprocket (Logistics), Mtalkz (SMS)

EXPERIENCE

- **Indiefluence** Oct 2024 – Present
Full-Stack Developer Kurukshetra, Haryana
 - Developed and maintained full-stack web and mobile applications using React.js, React Native (Expo), Next.js, Node.js, and Python-based serverless microservices on AWS.
 - Designed and implemented RESTful APIs with JWT authentication, webhook event handling, and efficient backend logic to support core application features.
 - Integrated databases using Supabase, MongoDB (with atomic transactions), and Valkey caching, ensuring secure data handling and optimized query performance.
 - Built and deployed serverless microservices on AWS Lambda with API Gateway, EventBridge scheduling, and CloudWatch monitoring for production reliability.
 - Collaborated with cross-functional teams to improve application performance, reliability, and overall user experience across web and mobile platforms.
- **HopingMinds** Jul 2024 – Sep 2024
Full-Stack Intern Mohali, Punjab
 - Worked on frontend development using HTML, CSS, JavaScript, and React.js, following modern UI and responsive design practices.
 - Assisted in backend development tasks including API integration and database operations using MySQL and MongoDB.
 - Used Git and GitHub for version control and team collaboration in real-world project workflows.

PROJECTS

- **Pawgloo — Veterinary Telehealth Platform** Jan 2025 – Present
React Native, Expo, NativeWind, Python, AWS Lambda, MongoDB, Valkey, GetStream, Cashfree
 - Built a production-grade telehealth ecosystem for the veterinary industry connecting pet owners with vets via real-time WebRTC video consultations, using React Native (Expo) with NativeWind and GetStream Video SDK.
 - Engineered a serverless Python microservices backend on AWS Lambda and API Gateway; resolved critical 504 timeout and call-conflict bugs in the initiateCall service, achieving consistent call reliability at scale.
 - Designed a tamper-evident double-entry financial ledger using atomic MongoDB transactions with SHA-256 hash-chaining, automating GST/TDS calculations and multi-tier Cashfree payouts (Pay-in → Escrow → Payout).
 - Implemented idempotency guards on all Cashfree and GetStream webhooks to ensure duplicate payment events are safely deduplicated; used Valkey for distributed session caching across Lambda instances.
 - Built a smart 60-minute join-window scheduling system via AWS EventBridge with passive call-check logic, eliminating accidental ringtone triggers while enforcing strict billing rules.

- **Rabbit Auto Care**

Jul 2024

Next.js, Supabase, Vercel, Shiprocket

- Developed a full-stack e-commerce platform for a premium car care brand using Next.js and Supabase, delivering a fast and responsive user experience.
- Implemented product listings, authentication, and order workflows with secure backend integration.
- Integrated Shiprocket for logistics management and deployed the application on Vercel for production use.

- **Genesis Classes**

Sep 2024

Next.js, Supabase, Tailwind CSS, Razorpay, Mtalkz

- Built a scalable educational platform using Next.js, Supabase, and Tailwind CSS for competitive exam preparation institutes.
- Integrated Razorpay payment gateway for online fee payments and Mtalkz for SMS communication services.
- Designed secure backend workflows for student data management and real-time application usage.

- **House of Aerawat**

Aug 2024

React.js, Node.js, Supabase, Tailwind CSS, Razorpay

- Developed a full-stack e-commerce application for handcrafted products using React.js, Node.js, and Supabase.
- Implemented product management, user authentication, and secure checkout with Razorpay integration.
- Optimized UI performance and responsiveness using Tailwind CSS for improved user engagement.

EDUCATION

- **Seth Jai Parkash Mukand Lal Institute of Engineering and Technology**

2021 – 2025

B.Tech in Information Technology (IT)
